Projects

E-Commerce API

Technologies: Laravel | Rest API

🔗 https://github.com/ashikurrahman-dev/e-commerce_api.git

- Created RESTful APIs for Admin: login, manage categories, products, and approve/decline orders.
- Developed Customer APIs for registration, login, product browsing, cart handling, and order placement.
- Secured cart access to only authenticated customers and handled data-based cart logic.
- Secured API routes with role-based Sanctum authentication and proper middleware.
- Structured clean API endpoints for scalable e-commerce functionality.

Pos & Inventory management system

Technologies: Laravel | Axios | JavaScript.

🔗 <https://github.com/ashikurrahman-dev/POS.git>

- Integrated JWT Authentication for secure user authentication and authorization.
- Efficient Customer Management
- Clean & Maintainable Codebase
- Dynamic Product Control
- Comprehensive Reporting

Education

Pabna Polytechnic Institute, Pabna
Construction

2020 - 2025
